ABOUT

Full-stack web developer specializing in the Microsoft .NET ecosystem and Angular. Experienced in building end-to-end web applications using ASP.NET Core MVC, Entity Framework Core, and SQL Server on the backend, paired with Angular and TypeScript for dynamic, component-based front ends. Comfortable across the stack — from designing relational database schemas and RESTful APIs to building responsive, Bootstrap-driven UIs. Currently deepening Angular expertise (component architecture, services, routing, and API integration) while actively building and deploying production-style .NET applications, with a strong focus on clean code, debugging discipline, and freelance-ready delivery.

PROJECTS

EprojectApp — E-Commerce Admin Panel

- Built a full-featured e-commerce admin panel using ASP.NET Core MVC, Entity Framework Core, and SQL Server, covering Customer, Category, and Product management modules.
- Implemented CRUD operations with EF Core eager loading (.Include()) for related entity data, and designed a clean Bootstrap-based UI (Electro template) across all modules.
- Handled file upload features (e.g., profile/image change functionality) and resolved recurring Razor syntax and controller-level bugs to keep the app stable.

Hospital Management System

- Developed a hospital management application to handle patient records, appointments, and hospital resources through a structured ASP.NET Core MVC backend with SQL Server.
- Designed a responsive, user-friendly interface with Bootstrap for both staff and administrator use cases.

Education Manager

- Built a web-based education/course management system using ASP.NET Core MVC and SQL Server to manage student, course, and enrollment data.
- Applied Entity Framework Core for data access and structured the app around clean MVC separation of concerns.

EDUCATION

Bachelor's in Computer System Engineering — Dawood University of Engineering and Technology (DUET)
Karachi, Pakistan

WORK EXPERIENCE

Full Stack Developer (Angular & ASP.NET Core 6) — [Company / Client Name][Start Date] – Present

- Developed responsive and user-friendly web applications using Angular and ASP.NET Core 6.
- Built reusable Angular components, modules, services, and routing for scalable applications.
- Created responsive UI using HTML5, CSS3, Bootstrap, and TypeScript.
- Implemented Reactive Forms, form validation, and custom validators.
- Integrated RESTful APIs with Angular using HttpClient.
- Used Angular Routing, Guards, and Lazy Loading to improve application performance.
- Managed application state and data binding using Angular best practices.
- Consumed and tested APIs using Postman.
- Developed secure REST APIs using ASP.NET Core 6 Web API.
- Implemented CRUD (Create, Read, Update, Delete) operations with Entity Framework Core.
- Designed and managed SQL Server databases, tables, relationships, and stored procedures.
- Implemented Authentication & Authorization using ASP.NET Core Identity and JWT.
- Used LINQ, Dependency Injection (DI), Repository Pattern, and MVC architecture.
- Handled exception logging, validation, and error handling.

- Used Git/GitHub for version control and team collaboration.
- Debugged and optimized application performance.
- Participated in requirement analysis, development, testing, and deployment.

Technologies

Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap

Backend: ASP.NET Core 6, C#, Web API

Database: SQL Server, Entity Framework Core, LINQ

Tools: Visual Studio 2022, Visual Studio Code, Git, GitHub, Postman

OTHER

Backend Skills: ASP.NET Core MVC, C#, Entity Framework Core, SQL Server, RESTful APIs, ASP.NET Identity, LINQ

Frontend Skills: Angular, TypeScript, Bootstrap, HTML5, CSS3, RxJS

Developer Tools: Visual Studio, Visual Studio Code, SQL Server Management Studio (SSMS), Git, GitHub, Postman

Soft Skills: Time Management, Effective Communication, Problem Solving, Growth Mindset, Team Work, Work Ethic, Willingness to Learn and Improve
